VOICE & DATA PRODUCTS

Standard Board Layout

1.750" +/- .010"

5.600" +/- .010"

The above diagram shows the basic board layout for all boards in the economy series. In addition to the standard configurations, we can produce any board layout in this configuration with little or no tooling or set up cost based upon order quantities.

Standard Frame Dimensions

Dia. .230"
(2X)

5.590" +/- .010"
6.000" +/- .010"
6.510" +/- .010"

The above diagram shows the standard mounting frame dimensions for the economy series. It is designed to be used in a can with a 6.0" hole pattern using Richco SLPB-2M-B/SLG-2M-B Plungers/Grommets (included). See web site for specifications. Recommended mounting hole diameter .250"-.256". Can also be mounted using self drilling screws in cans without a matching hole pattern. Not what you need? Proto-Tel can design and mold custom brackets and produce custom PCBA's to meet any application.
